1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submissions filed on 3-8-04 and 6-30-06 have been entered.
2. The status identifiers in claims 3, 10 and 12, of the response filed 3-8-04 are improper under 37 C.F.R. 1.121 because the status identifier "(Previously *presented*)" is the correct status identifier to use for a claim that was previously added or amended in an earlier amendment paper. Appropriate correction is required.
3. The preambles of claims 9-15 refer to a "machine readable storage" however was this intended to be a "machine readable storage medium" or a "machine readable storage apparatus" for example ? Appropriate explanation/correction is required.

Claim Rejections - 35 USC § 101

4. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

5. Claims 2-15 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claimed invention does not transform an article or physical object to a different state or thing (note: transformation of data is not "physical transformation") and does not produce a "useful, concrete and tangible

result". For example, in claim 2, the final result is "invoking said operation in the Web application as selected from said Web scenario template in lieu of invoking an operation in the Web application based upon said intercepted network message". However, it is not clear in the claim that this result is being conveyed to someone or something such that the usefulness of the invoking of the operation of the Web application could be realized, and that such an operation represents a specific, substantial and credible utility.

6. Claim 1 is allowed.

7. The following reference is cited as being art of general interest: Deboer et al. (7,043,460) which disclose a web browser-based object oriented application component test client.

8. Applicant's arguments with respect to claims 2-15 have been considered but are moot in view of the new ground(s) of rejection.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hal D. Wachsman whose telephone number is 571-272-2225. The examiner can normally be reached on Monday to Friday 7:00 A.M. to 4:30 P.M..
